

Catalog change for the prerequisites
for MATE 570 "Corrosion Phenomena:"
Current Prerequisite: CHEM 122 and Graduate Standing.
Proposed Prerequisite: Graduate standing or consent of
instructor.

Explanation (from Prof. D.Burleigh): The original prerequisite was put in place when MATE 570 was offered simultaneous with MATE 470, the undergraduate version. I have stopped offering MATE 470 for various reasons. I now want to put MATE 570 in line with the other graduate courses/electives.
